#### Brief Description of Arguments to be Presented:

Claims 1 and 43 include the limitation of the carrier being adopted to prevent fluid flow across the chamber and carrier interface. In contrast, in FIG 5 of Mansour, reference numeral 48 points to a chamber-carrier interface and fluid flows across this interface in a direction from 47 to 45 and towards 50. Pages 9 & 10 of the Response dated 6/9/05 include citations from Mansour regarding this important difference.
